Column 1 = „Name der Sorte (x bis y)“ means „name of variety (from x to y)“

Column 2 = „Bild“ means *click for a large image*

Column 3 = „€“ means *price in Euro for one cutting*

Column 4 = „max. ø Blüte“ means *max. diameter of bloom in cm*

Column 5 = „max. Blühtage“ means *max. days with open blossom*

Column 7 = „Vielblüher“ means *have much blooms?* "ja" (yes), "nein" (no), "mittel" (medium)

Column 6 = „Veredelung nötig?“ means *„Grafting required?“* the information which variety needs to be grafted, as it is not possible to be rooted, or the roots can not sufficiently nourish the plant.

- If there is a "ja" (yes), then it must be grafted.
- If there is a "nein" (no), the variety can be rooted.
- If there is a " ja / nein" (yes / no), I recommend for a variety of reasons to graft this variety
